presents

Digital Learning Design

A workshop presented by

Allison Miller, Vanguard Visions Consulting

'Digital learning' is gaining traction in the higher education sector, as more tertiary institutions begin to offer individual units and entire programs in the online space. But what are the characteristics of digital learning that make it good? How does it engage students? And what are the characteristics of digital learning that make it appealing to learners?

This workshop provides an opportunity for staff from the Faculty of Health Sciences to learn more about digital learning pedagogy, and digital learning design. Effective digital learning involves more than simply taking content that has previously been delivered face-to-face, and making it available online – there is a great deal of purposeful redevelopment required. It includes the deliberate integration of technology – not for technology's sake, but because it adds value to the learning experience and improves learning outcomes.

Allison Miller is a Director and Principal Consultant at Vanguard Visions, with expertise in ePortfolios, digital capability, and eLearning.

Join Allison, and enhance your online presence to make learning more engaging for students!

Date: Tuesday 25 June, 2013

Time: 1.00-3.00pm

Venue: Videoconference Rooms

Melbourne – Room 5.30
North Sydney – Lvl 16, Tennison Woods House
Brisbane – AC.22
